

Cybersecurity Awareness Training

Strengthening your first line of defence – your people

Cyber Risk is a Business Risk

Today's cyber threats no longer target systems alone – they target employees. A single click on a malicious email can result in financial loss, reputational damage, regulatory penalties, and operational disruption.

Technology alone is not enough. A security-conscious workforce is your strongest and most sustainable line of defense.

Our cybersecurity awareness programmes are designed to reduce human-related risk, strengthen compliance posture, and build lasting organisational resilience.

Our Services

Service	Description
Staff Cybersecurity Awareness Training	Engaging, practical sessions covering phishing, vishing, password security, secure remote working, data protection, ransomware awareness, and incident reporting.
Social Engineering Simulations	Controlled phishing simulation campaigns with behavioural analytics, click-rate reporting, and risk-based improvement recommendations.
Live Hacking Demonstrations	Real-time demonstrations showing how cyber-attacks occur and how easily credentials and communications can be compromised.
Executive & Board Awareness	Governance-focused sessions covering cyber risk oversight, regulatory expectations, financial impact, and strategic risk responsibilities.
Tabletop Cyber Incident Exercises	Simulated cyber incident scenarios testing decision-making, crisis communication, business continuity alignment, and escalation procedures.

Measurable Outcomes

- Reduced phishing click rates
- Increased incident reporting
- Improved audit readiness

- Stronger ISO 27001 awareness compliance
- Enhanced organisational resilience

Why Partner with Us

- Risk-based and industry-tailored content
- Executive-ready delivery
- Detailed reporting for management oversight
- Alignment with ISO 27001 and regulatory expectations
- Focus on sustainable behavioural change

Cybersecurity awareness is not a one-off initiative – it is a strategic investment in protecting your organisation’s reputation, operations, and future.
