

GOVERNANCE, RISK AND COMPLIANCE (GRC) WORKSHOP

Driving longer term sustainability...

In conjunction with the Institute of Risk Management, BDO Risk Advisory Training Academy presents a series of six risk management courses over a 2 year program, starting with the risk management framework through risk identification until the ongoing reporting and monitoring of the identified risks.

This two-day workshop is the third of the six courses and investigates the design and implementation of GOVERNANCE, RISK and COMPLIANCE. Through this course, we will take an all-encompassing view of risks as necessary, if management and the board are to steer the organization and make appropriate decisions based on complete, accurate, and timely information to remain agile in their respective markets. In this course we look at GRC through the concept of "Principled Performance from the OCEG."

About the trainer

Laura Mallabone

Laura is an enterprise-wide risk management specialist with 20 years' of risk management experience across industries and geographies, both in industry and as a consultant. Laura has assisted companies to develop, implement and evolve their risk management.

Laura is a registered facilitator and has designed and facilitated a number of courses (i.e. Risk Management and Governance, Risk & Compliance) on behalf of the Institute of Risk Management South Africa (IRMSA). She was also involved in the development of the initial International Risk Management Standard (ISO31000), review team for the recently launched ISO 31000 2018 Standard.
